

SPECIES MANAGEMENT PROFILE

Austrostipa nodosa knotty speargrass

Group: Magnoliophyta (flowering plants), Liliopsida (monocots), Poales, Poaceae

Status: *Threatened Species Protection Act 1995:* Not listed
Environment Protection and Biodiversity Conservation Act 1999: Not listed

Endemic: Found in Tasmania and elsewhere

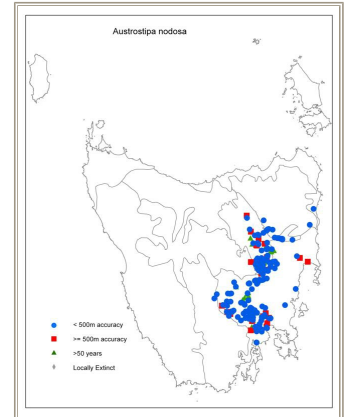

Status:

A complete species management profile is not currently available for this species. Check for further information on this page and any relevant Activity Advice.

Key Points

- Important:** Is this species in your area? Do you need a permit? Ensure you've covered all the issues by checking the Planning Ahead page.
- Important:** Different threatened species may have different requirements. For any activity you are considering, read the Activity Advice pages for background information and important advice about managing around the needs of multiple threatened species.

Surveying

Key	Survey reliability more info
M	Best time to survey
M	Potential time to survey
M	Poor time to survey
M	Non-survey period

To ensure you follow the law - check whether your survey requires a permit. Always report any new records to the Natural Values Atlas, or send the information direct to the Threatened Species Section. Refer to the Activity Advice: Surveying page for background information.

<i>Austrostipa nodosa</i>	Spring			Summer				Autumn				Winter

- Flowering of this grass is from August to October (Flora of Victoria). Most herbarium specimens have been collected from late October to December though some observations have been made at other times of the year, presumably identified from remnant flower spikes. Mature inflorescences are required for identification. Intergradation with other species may confuse identification.
- In Tasmania, this species occurs predominantly in the eastern half of the State in grassland or open forest.

Contact details: Threatened Species Section, Department of Primary Industries, Parks, Water and Environment, GPO Box 44, Hobart, Tasmania, Australia, 7001. Phone (1300 368 550).

Permit: A permit is required under the Tasmanian *Threatened Species Protection Act 1995* to 'take' (which includes kill, injure, catch, damage, destroy and collect), keep, trade in or process any specimen or products of a listed species. Additional permits may also be required under other Acts or regulations to take, disturb or interfere with any form of wildlife or its products, (e.g. dens, nests, bones). This may also depend on the tenure of the land and other agreements relating to its management.
