

SPECIES MANAGEMENT PROFILE

Leucopatus anophthalmus Blind Velvet Worm

Group: Onychophora (velvet worms), Onychophora (velvet worms), Onychophora (velvet worms), Peripatopsidae

Status: *Threatened Species Protection Act 1995*: **endangered**
Environment Protection and Biodiversity Conservation Act 1999: **Endangered**

Endemic Status:

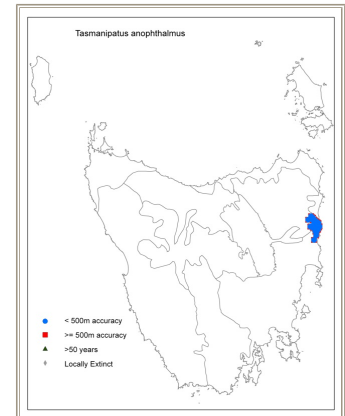

The Blind velvet worm is a member of a primitive but successful group of animals known from the fossil record back to the Cambrian. The species has no eyes and a white cylindrical body extending to about 50mm in length when walking. It has 15 pairs of stubby, non-jointed legs. They are carnivorous and hunt at night. The species occurs in dry and wet eucalypt forest in shaded, moist areas like stream sides and are often found in decaying logs or under moss or in deep leaf litter. The blind velvet worm has a restricted range in the Mt Elephant/South Sister area and is found from near sea level to about 800m.

Threats come from the loss of habitat including removal of rotting logs by conversion of native forest to plantation or agriculture, too frequent or high intensity fire and firewood collection.

A complete species management profile is not currently available for this species. Check for further information on this page and any relevant Activity Advice.

Please note that this species was previously named *Tasmanipatus anophthalmus*.

Key Points

- **Important:** Is this species in your area? Do you need a permit? Ensure you've covered all the issues by checking the Planning Ahead page.
- **Important:** Different threatened species may have different requirements. For any activity you are considering, read the Activity Advice pages for background information and important advice about managing around the needs of multiple threatened species.

Permit: A permit is required under the Tasmanian *Threatened Species Protection Act 1995* to 'take' (which includes kill, injure, catch, damage, destroy and collect), keep, trade in or process any specimen or products of a listed species. Additional permits may also be required under other Acts or regulations to take, disturb or interfere with any form of wildlife or its products, (e.g. dens, nests, bones). This may also depend on the tenure of the land and other agreements relating to its management.
