

SPECIES MANAGEMENT PROFILE

Callitriche sonderi matted waterstarwort

Group: Magnoliophyta (flowering plants), Magnoliopsida (dicots), Lamiales, Plantaginaceae

Status: *Threatened Species Protection Act 1995:* rare
Environment Protection and Biodiversity Conservation Act 1999: Not listed

Endemic: Found in Tasmania and elsewhere

Status:

A complete species management profile is not currently available for this species. Check for further information on this page and any relevant Activity Advice.

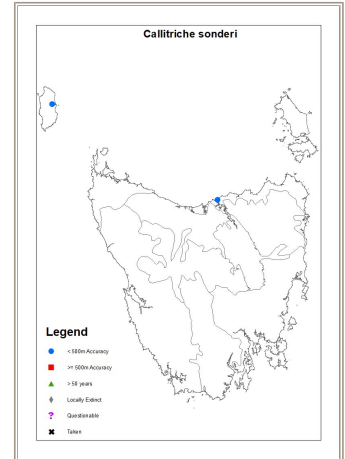

Key Points

- Important:** Is this species in your area? Do you need a permit? Ensure you've covered all the issues by checking the Planning Ahead page.
- Important:** Different threatened species may have different requirements. For any activity you are considering, read the Activity Advice pages for background information and important advice about managing around the needs of multiple threatened species.

Surveying

Key	Survey reliability more info
M	Best time to survey
M	Potential time to survey
M	Poor time to survey
M	Non-survey period

To ensure you follow the law - check whether your survey requires a permit. Always report any new records to the Natural Values Atlas, or send the information direct to the Threatened Species Section. Refer to the Activity Advice: Surveying page for background information.

- This small, soft, low growing herb can be distinguished from the widespread and introduced *Callitriche stagnalis* by its leaves and broader fruit. The flowers are small and unisexual. This species flowers from September to December and the only two Tasmanian herbarium specimens collected from the wild were collected in early January and early February.
- This semi-aquatic species generally occurs on river flood plains or other places subject to periodic inundation and in Tasmania is only known from the Sea Elephant River on King Island.

Permit: A permit is required under the Tasmanian *Threatened Species Protection Act 1995* to 'take' (which includes kill, injure, catch, damage, destroy and collect), keep, trade in or process any specimen or products of a listed species. Additional permits may also be required under other Acts or regulations to take, disturb or interfere with any form of wildlife or its products, (e.g. dens, nests, bones). This may also depend on the tenure of the land and other agreements relating to its management.
