

SPECIES MANAGEMENT PROFILE

Calystegia sepium subsp. *sepium* swamp bindweed

Group: Magnoliophyta (flowering plants), Magnoliopsida (dicots), Solanales, Convolvulaceae

Status: *Threatened Species Protection Act 1995*: rare
Environment Protection and Biodiversity Conservation Act 1999: Not listed

Endemic Status: Found in Tasmania and elsewhere

A complete species management profile is not currently available for this species. Check for further information on this page and any relevant Activity Advice.

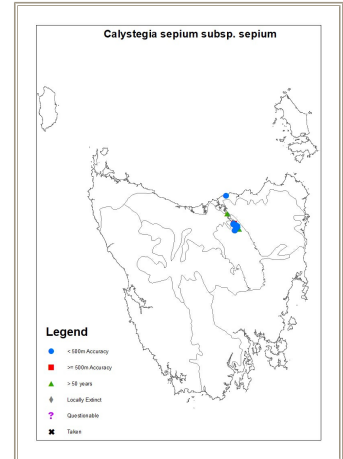

Key Points

- Important:** Is this species in your area? Do you need a permit? Ensure you've covered all the issues by checking the Planning Ahead page.
- Important:** Different threatened species may have different requirements. For any activity you are considering, read the Activity Advice pages for background information and important advice about managing around the needs of multiple threatened species.

Surveying

Key	Survey reliability more info
M	Best time to survey
M	Potential time to survey
M	Poor time to survey
M	Non-survey period

To ensure you follow the law - check whether your survey requires a permit. Always report any new records to the Natural Values Atlas, or send the information direct to the Threatened Species Section. Refer to the Activity Advice: Surveying page for background information.

<i>Calystegia sepium</i>	Spring	Summer	Autumn	Winter
swamp bindweed	S S O O N N	D D J J F F	M M A A M M	J J J J A A

- While peak flowering occurs over spring and summer, flowers are present on this perennial twining or prostrate vine all year, and as the plant is conspicuous, surveys for it can be undertaken at any time of year. This species is a known coloniser of waste areas and may regenerate prolifically after fire. *Calystegia sepium* is similar to the introduced *Calystegia silvatica* with which it can co-occur.
- In Tasmania, this species has been recorded from riverbanks and the margins of forests in the north of the State around the Tamar region.

Permit: A permit is required under the Tasmanian *Threatened Species Protection Act 1995* to 'take' (which includes kill, injure, catch, damage, destroy and collect), keep, trade in or process any specimen or products of a listed species. Additional permits may also be required under other Acts or regulations to take, disturb or interfere with any form of wildlife or its products, (e.g. dens, nests, bones). This may also depend on the tenure of the land and other agreements relating to its management.
