

## SPECIES MANAGEMENT PROFILE

*Epacris graniticola* granite heath

**Group:** Magnoliophyta (flowering plants), Magnoliopsida (dicots), Ericales, Ericaceae

**Status:** *Threatened Species Protection Act 1995*: vulnerable  
*Environment Protection and Biodiversity Conservation Act 1999*: Critically Endangered

**Endemic:** Found only in Tasmania

**Status:**

A complete species management profile is not currently available for this species. Check for further information on this page and any relevant Activity Advice.

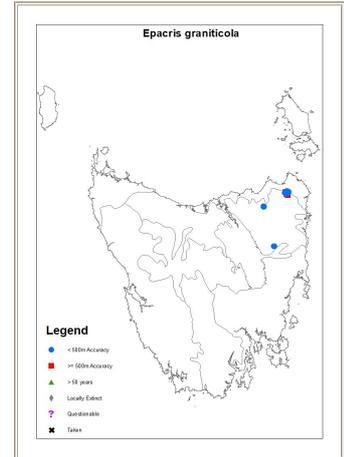

### Key Points

- Important:** Is this species in your area? Do you need a permit? Ensure you've covered all the issues by checking the Planning Ahead page.
- Important:** Different threatened species may have different requirements. For any activity you are considering, read the Activity Advice pages for background information and important advice about managing around the needs of multiple threatened species.

### Surveying

Key	Survey reliability more info
M	Best time to survey
M	Potential time to survey
M	Poor time to survey
M	Non-survey period

To ensure you follow the law - check whether your survey requires a permit. Always report any new records to the Natural Values Atlas, or send the information direct to the Threatened Species Section. Refer to the Activity Advice: Surveying page for background information.

- Epacris graniticola* is best identified during its flowering period, September to late October, as flowers aid detection and enable confirmation of the identity of this generally erect multi-stemmed woody shrub. However, observations of this species have been made through most of the year.
- Epacris graniticola* is restricted to granite outcrops in northeastern Tasmania. It is usually found growing amongst clumps of moss and lichen in moist depressions and fissures on exposed rock platforms, but may also grow in seepage areas associated with granite slabs in dry scrub-forest. The elevation range of known sites is 80 to 730 m above sea level.

**Contact details:** Threatened Species Section, Department of Natural Resources and Environment Tasmania, GPO Box 44, Hobart, Tasmania, Australia, 7001. Phone (1300 368 550).

**Permit:** A permit is required under the Tasmanian *Threatened Species Protection Act 1995* to 'take' (which includes kill, injure, catch, damage, destroy and collect), keep, trade in or process any specimen or products of a listed species. Additional permits may also be required under other Acts or regulations to take, disturb or interfere with any form of wildlife or its products, (e.g. dens, nests, bones). This may also depend on the tenure of the land and other agreements relating to its management.
