

## SPECIES MANAGEMENT PROFILE

*Eucalyptus morrisbyi* morrisbys gum

**Group:** Magnoliophyta (flowering plants), Magnoliopsida (dicots), Myrtales, Myrtaceae

**Status:** *Threatened Species Protection Act 1995:* **endangered**  
*Environment Protection and Biodiversity Conservation Act 1999:* **Endangered**

**Endemic:** Found only in Tasmania

**Status:**

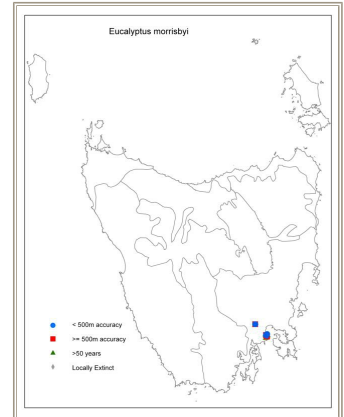

A complete species management profile is not currently available for this species. Check for further information on this page and any relevant Activity Advice.

### Key Points

- Important:** Is this species in your area? Do you need a permit? Ensure you've covered all the issues by checking the Planning Ahead page.
- Important:** Different threatened species may have different requirements. For any activity you are considering, read the Activity Advice pages for background information and important advice about managing around the needs of multiple threatened species.

### Surveying

Key	Survey reliability more info
<b>M</b>	Best time to survey
M	Potential time to survey
M	Poor time to survey
M	Non-survey period

To ensure you follow the law - check whether your survey requires a permit. Always report any new records to the Natural Values Atlas, or send the information direct to the Threatened Species Section. Refer to the Activity Advice: Surveying page for background information.

<i>Eucalyptus morrisbyi</i>	Spring	Summer	Autumn	Winter
morrisbys gum	S S O O N N	D D J J	F F M M A A	M M J J J J A A

- This small tree can be identified at any time of the year though mature trees (with capsules) are required to confirm the identity of this species. *Eucalyptus morrisbyi* can hybridise with white gum (*Eucalyptus viminalis*). Peak flowering occurs from February to May.
- Eucalyptus morrisbyi* occurs in coastal, dry sclerophyll woodland on gentle to hilly slopes with poor drainage. It tends to be restricted to gullies that offer some relief in this drought prone, low rainfall area. It is associated with poor soils, with the Calverts Hill subpopulation and associated remnant stands occurring on recent sands overlying dolerite and the Risdon subpopulation on Permian mudstone.

### Recovery Plan

**Cite as:** Threatened Species Section (2019). *Eucalyptus morrisbyi* (*morrisbys gum*): *Species Management Profile for Tasmania's Threatened Species Link*. <https://www.threatenedspecieslink.tas.gov.au/Pages/Eucalyptus-morrisbyi.aspx>. Department of Primary Industries, Parks, Water and Environment, Tasmania. Accessed on 20/11/2019.

**Contact details:** Threatened Species Section, Department of Primary Industries, Parks, Water and Environment, GPO Box 44, Hobart, Tasmania, Australia, 7001. Phone (1300 368 550).

**Permit:** A permit is required under the Tasmanian *Threatened Species Protection Act 1995* to 'take' (which includes kill, injure, catch, damage, destroy and collect), keep, trade in or process any specimen or products of a listed species. Additional permits may also be required under other Acts or regulations to take, disturb or interfere with any form of wildlife or its products, (e.g. dens, nests, bones). This may also depend on the tenure of the land and other agreements relating to its management.
