

SPECIES MANAGEMENT PROFILE

Eucalyptus perriniana spinning gum

Group: Magnoliophyta (flowering plants), Magnoliopsida (dicots), Myrtales, Myrtaceae

Status: *Threatened Species Protection Act 1995*: rare
Environment Protection and Biodiversity Conservation Act 1999: Not listed

Endemic: Found in Tasmania and elsewhere

Status:

A complete species management profile is not currently available for this species. Check for further information on this page and any relevant Activity Advice.

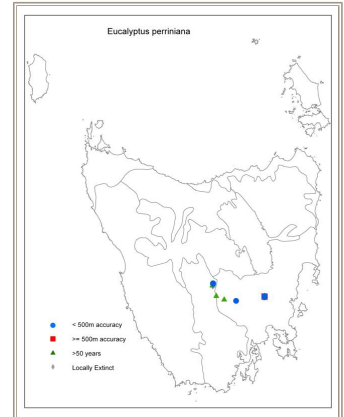

Key Points

- Important:** Is this species in your area? Do you need a permit? Ensure you've covered all the issues by checking the Planning Ahead page.
- Important:** Different threatened species may have different requirements. For any activity you are considering, read the Activity Advice pages for background information and important advice about managing around the needs of multiple threatened species.

Surveying

Key	Survey reliability more info
M	Best time to survey
M	Potential time to survey
M	Poor time to survey
M	Non-survey period

To ensure you follow the law - check whether your survey requires a permit. Always report any new records to the Natural Values Atlas, or send the information direct to the Threatened Species Section. Refer to the Activity Advice: Surveying page for background information.

- This small tree with either a mallee habit or a single trunk can be identified at any time of the year though mature trees (with capsules) are required to confirm the identity of this species. The species intergrades with *Eucalyptus rodwayi*. Flowering is from November to May, with peak flowering in February to March.
- In Tasmania, *Eucalyptus perriniana* occurs in the Southern Midlands at altitudes of 500 to 600 m above sea level in sedgy dry sclerophyll woodland dominated by *Eucalyptus tenuiramis*, where *Eucalyptus perriniana* coexists and intergrades with *Eucalyptus rodwayi*. The plants are seasonally inundated in marshy hollows and are prone to severe frosts.

Contact details: Threatened Species Section, Department of Natural Resources and Environment Tasmania, GPO Box 44, Hobart, Tasmania, Australia, 7001. Phone (1300 368 550).

Permit: A permit is required under the Tasmanian *Threatened Species Protection Act 1995* to 'take' (which includes kill, injure, catch, damage, destroy and collect), keep, trade in or process any specimen or products of a listed species. Additional permits may also be required under other Acts or regulations to take, disturb or interfere with any form of wildlife or its products, (e.g. dens, nests, bones). This may also depend on the tenure of the land and other agreements relating to its management.
