

SPECIES MANAGEMENT PROFILE

Frankenia pauciflora var. *gunnii* southern seaheath

Group: Magnoliophyta (flowering plants), Magnoliopsida (dicots), Violales, Frankeniaceae

Status: *Threatened Species Protection Act 1995*: rare
Environment Protection and Biodiversity Conservation Act 1999: Not listed

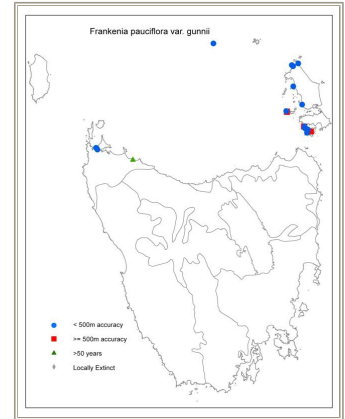

Endemic Status: Found in Tasmania and elsewhere

A complete species management profile is not currently available for this species. Check for further information on this page and any relevant Activity Advice.

Key Points

- Important:** Is this species in your area? Do you need a permit? Ensure you've covered all the issues by checking the Planning Ahead page.
- Important:** Different threatened species may have different requirements. For any activity you are considering, read the Activity Advice pages for background information and important advice about managing around the needs of multiple threatened species.

Surveying

Key	Survey reliability more info
M	Best time to survey
M	Potential time to survey
M	Poor time to survey
M	Non-survey period

To ensure you follow the law - check whether your survey requires a permit. Always report any new records to the Natural Values Atlas, or send the information direct to the Threatened Species Section. Refer to the Activity Advice: Surveying page for background information.

southern seaheath	S	S	O	O	N	N	D	D	J	J	F	F	M	M	A	A	M	M	J	J	J	J	A	A

- Frankenia pauciflora* var. *gunnii* is the only member of its family (Frankeniaceae) in Tasmania. The presence of flowers aids the detection of this small, much branched creeping perennial undershrub. Flowering occurs over most of the year (Flora of Victoria) though most Tasmanian herbarium specimens have been collected in November to December.
- In Tasmania, *Frankenia pauciflora* var. *gunnii* is restricted to coastal areas, occurring on exposed granite in the spray zone, usually on the north and north-western shores (Furneaux Group islands) and in salt marshes (Short and Marcus Islands in Robbins Strait on the north-west coast).

Permit: A permit is required under the Tasmanian *Threatened Species Protection Act 1995* to 'take' (which includes kill, injure, catch, damage, destroy and collect), keep, trade in or process any specimen or products of a listed species. Additional permits may also be required under other Acts or regulations to take, disturb or interfere with any form of wildlife or its products, (e.g. dens, nests, bones). This may also depend on the tenure of the land and other agreements relating to its management.
