

## SPECIES MANAGEMENT PROFILE

*Ranunculus diminutus* brackish buttercup

**Group:** Magnoliophyta (flowering plants), Magnoliopsida (dicots), Ranunculales, Ranunculaceae

**Status:** *Threatened Species Protection Act 1995*: **endangered**  
*Environment Protection and Biodiversity Conservation Act 1999*: Not listed

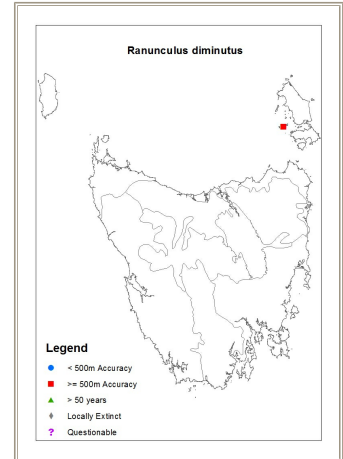

**Endemic Status:** Found in Tasmania and elsewhere

*Ranunculus diminutus* (brackish buttercup) is a perennial herb that is known in Tasmania from only one collection made in 1975 from Badger Island in Bass Strait. The species grows on intermittently wet sites though surveys are required to determine whether the species still occurs in Tasmania.

### Key Points

- **Important:** Is this species in your area? Do you need a permit? Ensure you've covered all the issues by checking the Planning Ahead page.
- **Important:** Different threatened species may have different requirements. For any activity you are considering, read the Activity Advice pages for background information and important advice about managing around the needs of multiple threatened species.

### Further information

**Contact details:** Threatened Species Section, Department of Natural Resources and Environment Tasmania, GPO Box 44, Hobart, Tasmania, Australia, 7001. Phone (1300 368 550).

**Permit:** A permit is required under the Tasmanian *Threatened Species Protection Act 1995* to 'take' (which includes kill, injure, catch, damage, destroy and collect), keep, trade in or process any specimen or products of a listed species. Additional permits may also be required under other Acts or regulations to take, disturb or interfere with any form of wildlife or its products, (e.g. dens, nests, bones). This may also depend on the tenure of the land and other agreements relating to its management.
