

## SPECIES MANAGEMENT PROFILE

*Zieria veronicea* subsp. *veronicea* pink zieria

**Group:** Magnoliophyta (flowering plants), Magnoliopsida (dicots), Sapindales, Rutaceae

**Status:** *Threatened Species Protection Act 1995*: **endangered**  
*Environment Protection and Biodiversity Conservation Act 1999*: Not listed

**Endemic:** Found in Tasmania and elsewhere

**Status:**

*Zieria veronicea* subsp. *veronicea* is a small shrub now known in Tasmania from two small near-coastal sites in the northeast where it grows in heathland and heathy woodland. Fewer than 200 mature individuals are known, all but 8 in one subpopulation. This and the small size of plants place the species at risk of loss from unforeseen human activities and chance events. The main threats are frequent low intensity burns that kill post-fire recruits before they set seed and sufficiently replenish the soil seed bank, or the prolonged absence of fire due to mortality and depletion of the soil seed store. Infection with the root rot pathogen *Phytophthora cinnamomi* represents a possible, albeit low threat.

A complete species management profile is not currently available for this species. Check for further information on this page and any relevant Activity Advice.

### Key Points

- **Important:** Is this species in your area? Do you need a permit? Ensure you've covered all the issues by checking the Planning Ahead page.
- **Important:** Different threatened species may have different requirements. For any activity you are considering, read the Activity Advice pages for background information and important advice about managing around the needs of multiple threatened species.

**Contact details:** Threatened Species Section, Department of Primary Industries, Parks, Water and Environment, GPO Box 44, Hobart, Tasmania, Australia, 7001. Phone (1300 368 550).

**Permit:** A permit is required under the Tasmanian *Threatened Species Protection Act 1995* to 'take' (which includes kill, injure, catch, damage, destroy and collect), keep, trade in or process any specimen or products of a listed species. Additional permits may also be required under other Acts or regulations to take, disturb or interfere with any form of wildlife or its products, (e.g. dens, nests, bones). This may also depend on the tenure of the land and other agreements relating to its management.
